BIOCLIMATIC LOUVRE SYSTEM

Introducing the Impact Bioclimatic Louvre System: Your premier choice for high-quality and cost-effective opening louvre roofs in the New Zealand market. Engineered for excellence, our system is tailored to craft year-round outdoor living spaces for your home, precisely designed to your preferences. With seamless control at your fingertips, our opening louvre roofs provide full command over your outdoor environment. Transform your living experience and embrace the outdoors, shielded from adverse weather conditions. Experience the ultimate blend of comfort and versatility with Impact Bioclimatic Louvre System.

PRODUCT SPECIFICATIONS

- **Material:** High Grade 6063-T6 Aluminum Alloy
- **Coating:** Anodized Powder Coating for durability
- **Thickness:** All extrusions up to 3 mm gauge
- **UV Protection:** UV Resistant powder coating
- **Slats:** Movable slats with integrated LED lights
- **Water Drainage:** 3-degree slope for efficient water drainage
- **Drainage System:** Concealed inbuilt drainage system in posts
- **Lighting:** Integrated LED lighting on structure perimeter and posts
- **Rain Sensor:** Equipped with automatic shutoff function for added convenience
- **Control Options:** Remote and Automatic controls for operational flexibility

FEATURES & BENEFITS

- **Premium Material:** Utilizes best-in-class aluminum for louvres' manufacturing
- **UV Protection:** Provides 100% UV protection for longevity
- **Snow Loading Capacity:** Withstands up to 80 cm of snow loading
- **Wind Resistance:** Endures winds up to 200km/h
- **Integrated Lighting:** Features integrated LED lighting for enhanced ambiance
- **Electrical Components:** Outdoor electrical components rated IP67 for durability
- **Customization:** Available in custom designs and RAL colors to suit individual preferences
- **Warranty:** Comes with a 10-year structural warranty for peace of mind

ELITE CANOPY

Elevate your outdoor lifestyle with Impact Elite Canopies. Renowned for their premium-grade aluminium construction, Impact Elite Canopies stand out as the pinnacle of quality and durability. Offering a wide array of styles, colours, and roof types, our canopies empower you to tailor your outdoor living space to perfection, effortlessly merging your home with your garden. IMPACT PVC FENCE

Introducing our high-quality PVC fencing solutions, designed to enhance the beauty, security, and privacy of your property. Crafted with precision and durability in mind, our PVC fences offer a perfect blend of style and functionality, making them the ideal choice for residential and commercial properties alike.

PRODUCT SPECIFICATIONS

- **Material:** Constructed from durable, low-maintenance vinyl material, ensuring long-lasting performance and minimal upkeep.
- **Colour:** Features a rich colour palette that adds elegance and charm to your home's exterior, enhancing its overall aesthetic appeal.
- **Maintenance:** Unlike wood fences, our PVC fence requires no sanding or painting, saving you time and effort on maintenance tasks.
- **Installation:** Designed with a lightweight construction for easy and fast installation, reducing labour costs and project timelines.
- **Reinforcement:** Each bottom rail is reinforced with aluminium, providing added strength and stability to the fence structure.
- **Weather Resistance:** Withstands the impact of rain and moisture better than wood fences, ensuring durability and reliability in New Zealand's diverse weather conditions.

IMPACT WPC DECK & FENCE

Introducing our Co-extrusion Impact WPC, the latest advancement in Wood Poly Carbonate technology. This second-generation product features a protective layer of polymer material, uniformly and securely encasing the core layer. Created through a high-temperature extrusion process, the protective layer and core are seamlessly integrated without the need for adhesives.

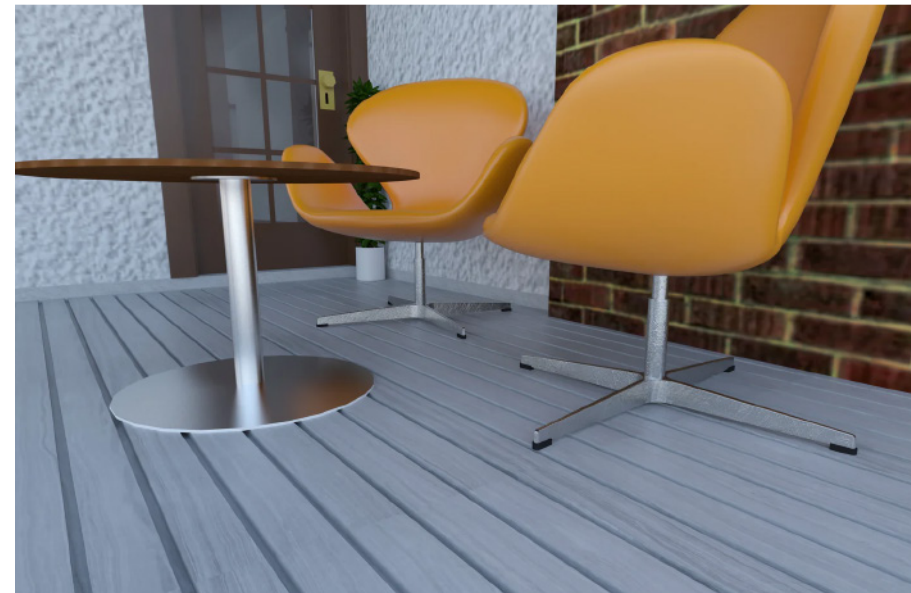

Crafted from high-density polyethylene (HDPE) and premium-quality wood fiber, our WPC offers enhanced durability and recyclability. The advanced macromolecular engineering materials used in the protective layer ensure longlasting performance, thanks to their unique formula and cutting-edge technology.

With our co-extrusion and covering techniques, the surface of our product is highly resistant to scratches, maintaining its pristine appearance over time. Meanwhile, the inner core remains composed of extruded wood plastic composite with high density, ensuring structural integrity and longevity.

Experience the superior quality and durability of Co-extrusion Impact WPC for your next project.

FEATURES & BENEFITS

- **High Strength:** Provides exceptional durability and structural integrity.
- **Flame-retardant:** Offers added safety in case of fire.
- **Mildew-proof/Anti-Corrosion/Anti-Crack:** Resistant to moisture, corrosion, and cracking.
- **Anti-Ultraviolet/Anti-Color Fading:** Protects against UV rays and maintains color vibrancy.
- **Non-Toxic/No-Wood Burr:** Ensures safety and smooth surface finish.
- **Cost Effective:** Eliminates the need for painting, staining, or sealing, reducing maintenance costs.
- **Adds Value to Your Project:** Enhances property aesthetics and functionality.
- **Beautiful:** Offers a visually appealing finish that stands up to harsh weather, stains, scratches, and fading.
